Projects

... that I ('m working | 've worked) on

Vim/Neovim

\blacksquare		
HH.		

nvim-pnpm-catalog-lens

Neovim plugin to show versions as diagnostics for PNPM catalog: field.

vim-ray-so

Generate a beautiful code image with https://ray.so on your Neovim/Vim

nvim-reset

Neovim plugin to disable all default keymaps with a single command

vim-bun-lock

If you gaze long enough into a bun.locb, the bun.locb will gaze back into you

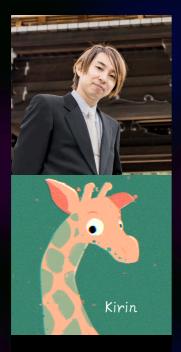

vim-svelte-inspector Use Svelte Inspector in Vim/Neovim!

vim-bad-apple

Do you wanna watch "Bad Apple!!" on your vim/neovim?

My Editor Journey

- 2015 2017 Atom
- 2017 2022 VSCode
- 2021 VSCode + Neovim
- 2022 Neovim

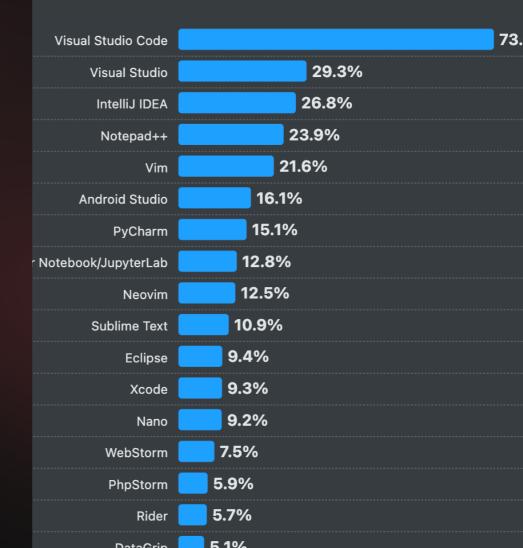

Why VSCode?

- De-facto Standard for Editor
- StackOverflow Survey 2024

Why VSCode? Good for modern Web Frontend Extensions are written in TypeScript Development **Easiest GUI** TypeScript first Lots of Extensions

No need to pay money!!

Why not VSCode?

Non-hackable

Keyboard unfriendly

Hard to create/publish Extensinos

Why the hell did I switch to Neovim

- Just looks cool
- That's it

Thank you for Listening!

just kidding

```

Why the hell did I switch to Neovim?

Just write Vim script or Lua & publish it on GH

Easy to customise

Hackable

Keyboard friendly

Terminal friendly

Fast & Lightweight

Do Neovim REALLY work for web frontend development?

Web Frontend Development is too complicated

- Config files
 - Vite / Webpack / Tailwind CSS ...
 - ESLint / Prettier ...
- Package.json / Lock file
- Assets (Images / Icons / Fonts)
- CSS
 - SCSS / SASS / CSS Modules
 - Tailwind CSS
- JavaScript / TypeScript
- Markups
 - TSX / JSX
 - Svelte / Vue / Astro

What do we want to editors for web frontend development?

- Supports syntax highlighting for various languages
- Supports auto-completion for various languages
- Supports documentation for various languages
- Supports managing lots of files
- Supports integration with other CLI tools
- Supports testing

... That's a lot!!!

Can we REALLY do them with Neovim?

A man said...

Vim can do that too それ、vimでもできるよ

🕴 MATTN

Setup a project

Terminal integration

- ugaterm.nvim by uga-rosa
- Open any type of terminal in Neovim including floating terminal

LSP (Language Server Protocol)

a protocol to communicate between editor and language server

Tree-sitter

- a parser generator tool and an incremental parsing library
- provides syntax highlighting, code folding, and more

- Code completion
 - nvim-cmp by hrsh7th
- Diagnostics / Information
 - Isp_lines.nvim
 - nvim-highlight-colors by BRENOPRATA10
- LSPs
 - nvim-vtsls by yioneko
 - nvim-lspconfig by N NEOVIM
 - efm-langserver by f MATTN
 - sveltejs/language-tools by Sveltejs
 - @tailwindcss/language-server by TAILWINDCSS

Enhance your editing files

- Make use of the builtin text-objects!
- Surround text with tags, quotes, etc.
 - mini.surround by E ECHASNOVSKI
 - nvim-insx by hrsh7th
- Toggle / switch numbers, symbols, text case, etc.
 - dial.nvim by monaqa
- Code suggestion by Al
 - copilot.lua by zbirenbaum + nvm-cmp
 - codecompanion.nvim by a OLIMORRIS

Testing

- neotest by scarriga
 - A framework for interacting with tests within NeoVim.
 - You can run tests and see the results in a Neovim

File Management

- oil.nvim
- made by 😤 stevearc
- A plugin to manage files as buffer
- You can yank, delete, and paste files like editing text
- You can use snippet)
 - I use vim-sonictemplate by f MATTN
- VSCODE cannot do that

File Switching

- other.nvim by RGROLI
 - You can switch related files easily (ex. sever and client files)

WebBrowser integration

- vim-svelte-inspector by A RYOPPIPPI
 - You can integrate browser inspector with Neovim

Git Integration

Git command operation

```
lazygit by  jesseduffield
```

```
vim.api.nvim_create_user_command("TG", function()
vim.cmd.tabe()
vim.fn.termopen("lazygit", {
    on_exit = function(_, _, _)
    vim.cmd.tabclose()
    end,
    })
    local current_buffer = vim.api.nvim_get_current_buf()
    vim.keymap.set("t", "<esc>", "<esc>", { buffer = current_buffer, remap = false })
end, { nargs = 0 })
```

- gitsigns.nvim by LEWIS6991
- git-conflict.nvim by aкinsho

Conclusion

Conclusion

- Neovim is a great editor for frontend developers
- Neovim has good plugins for frontend development
- If you are a VSCode user and want to try Neovim, I recommend you to try it

Other plugins I didn't mention in this talk

- nvim-pnpm-catalog-lens by RYOPPIPPI
- vim-bun-lock by A RYOPPIPPI
- denippet.vim by by uga-rosa
